

Tax Amnesty Act violates Constitution

A five-judge bench of the Supreme Court has ruled that the Tax Amnesty Act, 2003, is unconstitutional. The majority opinion was delivered by Justice G.P. Weerasinghe. He said that the Act violated the principle of equality before the law and the right to property. The Act gave a special concession to tax defaulters, which was not available to other taxpayers. This, he said, was discriminatory and unconstitutional.

Years of Customs investigations go waste

Billions of dollars in revenue for the State have been lost because of the amnesty provisions. The government has spent millions of dollars on customs investigations over the years, but the amnesty has rendered all that effort a waste. Many taxpayers who had been investigated and found to be innocent have had their names cleared, while those who had not been investigated have had their names cleared as well.

Liberalisation of petroleum sector with IOC

Former PERC chief and chartered accountant Nihal Sri Ameresekera analyses causes for the crisis and a way out

By Nihal Sri Ameresekera F.C.A., F.C.M.A.

CABINET DECISIONS

Ceylon Petroleum Corporation (CPC) had commenced a process of being restructured in terms of Cabinet Memoranda dated 13.11.2002 and 1.7.2003 submitted by the then Minister of Power & Energy and approved by Cabinet on 2.1.2003 and 29.7.2003, respectively. Key features of the restructuring scheme had been the formation of a Company, called the 'Common User Facility Company' (CUF Company), which was to own and operate the storage and pipeline infrastructure of the CPC for petroleum products, and the formation of 3 Companies (Retail Companies) for retail operations to operate approximately 100 Filling Stations each of the CPC. The CPC operated around 350 Filling Stations, whilst about 600 Filling Stations were 'Dealer Owned - Dealer Operated' by franchise agents.

Whilst one of the Retail Companies was to be owned and operated by CPC (i.e. 'KEY-PETCO'), the other 2 Retail Companies were intended to be 100% owned and operated by strategic foreign parties in the petroleum sector. The CUF Company was to be equally owned i.e. 33 1/3% by the 3 Retail Companies.

By the Cabinet Memoranda dated 30.11.2002 and 21.5.2002 Cabinet approval had been sought and obtained by the then Minister of Power & Energy for the selection of Indian Oil Corporation Ltd. (IOC) to be the strategic party to own 100% of the 2nd Retail Company and 33 1/3% of the CUF Company 'on terms to be negotiated'.

The selection of IOC had not been on a 'competitive transparent bidding process', whereas at the same time by Cabinet Memoranda dated 1.10.2002 and 4.10.2002, the then Minister of Power & Energy had sought and obtained Cabinet approval for the strategic party to own and operate the 3rd Retail Company to be selected through an 'open competitive bidding process'.

By Cabinet Memorandum of 8.10.2003 the then Minister of Economic Reform, Science & Technology had sought and obtained Cabinet approval for the acceptance of IOC's 'negotiated offer' of US \$ 75 Mn. for the 100% ownership of the 2nd Retail Company and for 33 1/3% ownership of the CUF Company.

The Cabinet Memorandum of 8.10.2003 had

IOC Chairman K. Ramchandran

Lanka IOC Managing Director K. Ramakrishnan

Former PERC chief Nihal Sri Ameresekera

'subsidy claims' from the Government Rs. 9,618,974,115/- upto 30.4.2006.

In the meanwhile, early 2005 the new Government decided to negotiate with Bharat Petroleum Corporation Ltd. (BPCL) for the sale of 49% ownership (change of policy of selling 100% Shareholdings of the 3rd Retail Company together with its management rights and for 33 1/3% ownership of the CUF Company for the total consideration of US \$ 84 Mn., through an 'open competitive bidding process'.

During the ensuing discussions and negotiations with BPCL, it transpired that the

quarterly average from the year to 31.3.2004, for the year ended 31.3.2005 had been reported to be Rs. 15.2 Mn., and for the 9-Month period ended 31.12.2005 to be Rs. 26.0 Mn., whilst the 'subsidy claims from the Government' included in respect of this 'marketing and distribution costs' item has been Rs. 31.7 Mn., Rs. 200.9 Mn., and Rs. 187.7 Mn., respectively.

The 'pricing structure' provides for regular review for some items of costs i.e. insurance, losses due to evaporation, etc.

A comparison of the Income statements in the LIOC accounts for the 9-Month period to 31.12.2004 and the 12-Month period to 31.3.2005 had revealed 'unexplained' discrepancies between the 12-Month figures vis-à-vis the 9-Month figures, with the comparison showing a 'gross loss' of 9.13% for the 3-Month period to 31.3.2005, whereas there had been a 'gross profit' of 14.24% for the 9-Month period to 31.12.2004, when for comparison credit is taken for the full 'subsidy' claims from the Government for such period. As per the LIOC accounts for the 9-Month period to 31.12.2004, Rs. 2061 million has been accounted for as 'subsidy', as against Rs. 3602 million claimed as 'subsidy' from the Government upto 31.12.2004 of which Rs. 354 million has been in respect of the 3-Month period to 31.3.2004; and as per the LIOC accounts for the year to 31.3.2005, the full 'subsidy' claims from the Government of Rs. 6038 million has been fully accounted for.

The Government had agreed to 'subsidise losses' in terms of Clause 6.2 of the 'Share Sale & Purchase Agreement for 100 Filling Stations' in respect of specifically the following 5 products, retail prices of which have steeply increased during the 2 1/2 year period under review, as given in the table (see below).

Hence the 'profit margin' in the 'pricing structure' used for the 'pricing formula' for 'subsidies from the Government' being related to value, would be very much more for the 'same volume' of fuel handled, at such price differentials.

In such circumstances, the Secretary, Ministry of Finance by Letter dated 1.8.2006 stated that - 'As per the formula 5% profit margin of the base price is provided for the petroleum companies to recover their investment ... this ad-valorem margin was recognised when the prices were varying at around US \$ 30 - 35/bbl ... the market thinking at that time was that the prices would decline to a range of US \$ 22 - 25/bbl
